I. Health Services Information

1. Role of the School Nurse

School nursing is the specialized practice of professional nursing that can facilitate the well-being, academic success, and life-long achievement of students.

2. Qualifications for Professional School Nurses

The Registered Professional Nurse (RN) and Licensed Practical Nurse/Licensed Vocational Nurse (LPN/LVN) will be a graduate of an accredited nursing program and currently licensed to practice nursing as an RN or LPN/LVN in the state of Missouri. Current CPR certification is required and first aid certification is preferred.

It is the school nurse's responsibility to evaluate his/her own nursing practice in relationship to professional practice standards and guidelines, relevant statutes, and rules and regulations. Based upon this evaluation, current and up-to-date practice should result.

3. Job Description Summary

Differing job descriptions are provided for health services personnel according to their position responsibilities. (Please refer to the job descriptions included in the “Employment” section of this handbook. If you have questions about the job description for your position, please contact Human Resources for Non-Certificated Staff at 521-5300.

4. Professional Presentation of the School Nurse and Health Secretaries

As members of the multidisciplinary school team and representatives of the nursing profession, school nurses must evaluate their practice setting and choose attire to reflect a professional appearance. A professional image communicates respect and inspires confidence with students, families, and staff. Clothing should not prohibit a school nurse from the ability to respond quickly to emergent and urgent situations that may arise during a school day.

Attire should include:

- Nursing scrubs
- Business casual
- Capri slacks are acceptable at mid-calf length
- Sandals may be worn with the exception of flip-flops or beach type sandals
- District identification badges should be worn at all times
- Jewelry should be kept at a minimum with no exposed nose, lip, eyebrow or tongue rings
- Tattoos should not be exposed

5. Hours for Professional School Nurses

Full-time nurses are in attendance seven and three fourths (7.75) hours a day, five days a week. Supervisors determine the hours for school clinic operation. Health services must be available to students on a continuous basis, and clinics are not to be closed during the lunch hour. Nurses will be paid during their lunch break and will be expected to be on duty during that time.

6. Attendance

Regular attendance is an essential function of the job. If you must be absent, it is your responsibility to contact your appropriate building supervisor and the Director of Health Services as soon as possible so that arrangements can be made to cover your health clinic for the day.

Failure to report for duty or neglect to report absences for three (3) consecutive days will be considered by the employer as employee job abandonment.

Board of Education Policy 4310 states, "When employees are absent more than ten (10) days in any semester or more than fifteen (15) days per school year, their absence is considered excessive. The Superintendent/Designee will review each incident of excessive absence and may require the employee to provide medical documentation or may consider disciplinary actions up to and including termination. Appropriate documentation may also be requested for unusual patterns of absences, or absences of three or more consecutive days."

Exceptions to the district's leave policies should be directed to your supervisor to forward to the Human Resources Office.

7. Work Calendars

All full-time nursing personnel are appointed for one hundred eighty-five (185) days. Nurses are to be on duty when students are in attendance and on other days when they are needed to assist with health information, such as student enrollment days. Nurses should discuss the needs of the school with school administrators, and work days should be scheduled accordingly. Any changes to the established calendar must be presented to the Director of Health Services within the first month of school, and any changes in this schedule must be approved by the building supervisor and the director.

A copy of the Health Services Calendar is included in the "Employment" section of this handbook. It notes scheduled professional development days.

8. Trade Time

Nursing personnel are allowed to trade time within the work week with the approval of their building principal and Director of Health Services.

9. Salary and Benefits

Nurses are paid according to salary scales adopted by the Board of Education. A copy of the current scale is included in the "Employment" section of this handbook.

New employees will be placed on Step 1-10 of the scale, depending on previous experience. If District finances allow, nurses are advanced one step on the scale at the beginning of each fiscal year (July 1). This movement does not apply to new employees who are hired after April 1; they will remain on their step until the following year.

Nurses who are scheduled to work at least twenty-five (25) hours a week are paid on an "even pay" basis. This means that their annual salary is divided into equal payments, no matter how many days are worked in the month. Overtime, extra hours, or docks are adjusted on the paycheck following the month in which these events occur. If an employee exits from the district before the end of their work year, the final paycheck is adjusted to pay them for the actual days worked and any vacation days accrued at the time of exit.

10. Recording Work Time

All Health Services staff are employed on an hourly basis in accordance with the provisions of the Fair Labor Standards Act. They should record their working hours using the district's electronic timekeeping system. The payroll secretary will review your timesheet by verifying the information recorded in the system. The building principal will approve the timesheet at the end of the pay period.

Overtime is paid in accordance with the Fair Labor Standards Act. Time that Health Services staff are required to work beyond forty (40) hours in a seven day period (Monday-Sunday), will be compensated at time and half (1.5) of the regular hourly rate of pay.

Overtime is paid when an administrator requests Health Services staff to do tasks that cannot be completed during the forty (40) hour work week. Overtime must be approved by the Director of Health Services and the Human Resources Office.

11. Professional Ethics and Confidentiality

The Federal Education Rights and Privacy Act (FERPA), the Individuals with Disabilities Education Act (IDEA), and the Safe Schools Act require school districts to maintain confidentiality of students' records and progress, including students' health records. Nurses must maintain confidentiality and protect and promote the rights of students. Ensuring the security and privacy of both electronic and paper student health records is of utmost importance. By respecting and maintaining the student's right to privacy as part of the school nurse's moral and legal obligation, the school nurse can obtain essential information necessary in the care of the student as part of the nursing assessment. With informed verbal and written consent of the student (if appropriate) or parent/guardian, the school nurse may share this information with other multidisciplinary team members, concerned school personnel, and other health care providers or agencies for the benefit of the student. Only under extreme conditions may the duty of confidentiality be disregarded. Examples include the greater duty to protect life and prevent harm (e.g., suicide threat/attempt; homicide threat/attempt) and willful acts of spreading a contagious disease to others (Stanhope & Lancaster, 1992).

12. Chain of Command

All time off requests, or in the event you are required to stay before or after your normal hours, you are to contact the Director of Health Services for approval.

Questions and concerns related to clinic operations such as medications, illness, injuries, supplies and any other areas outlined in the Health Services Manual that the nurse is responsible for are to be directed to the Director of Health Services.

13. Confidentiality

Exchange of information to others is considered an on a need to know basis and should not be shared with other departments or other staff members, including other department staff members, unless directed to do so by the Director of Health Services.

14. Immunizations

The school nurse will be responsible for entering all immunizations into SNAP by the first week in October of each school year to ensure compliance of the Independence School District with State immunization requirements.

15. Emergency Action Plans

The school nurse will be responsible for completing all Emergency Action Plans by the second week in September and have them distributed to all staff that need to know how to care for the student in an emergency situation. All requests for Emergency Action Plans for specific conditions will be directed to the Director of Health Services.

16. Evaluations

To help you understand your job responsibilities and assess how well you are fulfilling those responsibilities, you will be evaluated using the performance-based evaluation included in the "Employment" section of this handbook. Although you may be evaluated at any time during the year, evaluations generally are completed in the spring. The Director of Health Services will discuss the evaluation with you and ask that you sign the evaluation. Please take time to study this evaluation and discuss any questions with the Director of Health Services.

Policy 4720 Suspension or Termination: Non-Certificated Staff may be accessed on the district website.

17. Harassment Policy

It is essential that you understand and follow policies when you work in the Independence School District. One important policy pertains to sexual harassment. Please review the included policy in the "Policies" section of this handbook carefully and address any questions to the building administrator.

18. Professional Development for Nurses

The Independence School District values on-going professional development for all employees. Nursing professional development is the lifelong process of active participation by nurses in learning activities that assist in developing and maintaining continuing competence (NASN 2003).

Professional development opportunities for district nurses will be designed to provide current evidence-based information that impacts the health and academic achievement of all students and to enhance the professional practice of school nursing. Professional development opportunities will be provided by the district on an annual basis and additional resources for continuing education will also be promoted. The work calendar in the "Employment" section of this handbook lists the professional development activities.

19. Substitutes

Substitutes may be requested through your building secretary. It is the responsibility of each nurse to update the substitute handbook on a yearly basis and as needed for their clinic. The handbook should include the school schedule, building contact persons and phone numbers, a confidential list of students with special health care concerns/needs, Emergency Action Plans and emergency procedures, a list of daily responsibilities, and any other information pertinent to the functioning of your clinic. The Substitute Nurse Handbook will be kept in a locked cabinet or file drawer due to the confidentiality of information included. The designated location will be specified by the clinic nurse.

II. Job Descriptions

20. Director of Health Services

DIRECTOR OF HEALTH SERVICES

Qualifications:

- Registered Nurse, licensed in Missouri required, BSN preferred
- Five (5) years nursing experience preferred
- Hepatitis B Vaccine series
- School nursing or pediatrics experience preferred
- Management and supervisory experience required

Fair Labor Standards Act Status: Exempt

Reports to:

Superintendent

Supervises:
